COURSE ROADMAP

Open and work through each of the documents called out below in a-z order.

- C#-GettingSetup-SharpDevelop
- C#-UsingSharpDevelop-QuickGuide
- 1-C#-Initial_Steps_Into_Syntax
- 2-C#-First_Steps_Into_Object_Oriented_Programming
- 3-C#-Misc_Data_Object_Issues
- 4-C#-Composition_and_Inheritance

Documents 1-4 will reference exercises. The requirements for the exercises can be found in the document “C#-OOP_Programming_Foundations-Assignments.”

I would encourage you to spend time on you own initiative writing code. Do not just review my code and wait for the exercises. You will learn more when you are doing hands-on, and when you are making mistakes. Use Google to help troubleshoot problems (I certainly do). You can pick-n-choose your spots to do your own hands-on Spend some time running and looking over the code examples I have provided. I tried to be very lean in my narrative. Since I only wrote about what I feel are the mission critical things it is worth reading my docs.

Move at your own pace and have fun.
